EDUCATION

Northeastern University, Boston, MA

April 2025

B.S. in Computer Science

GPA: 3.5

Relevant Coursework: Data Structures & Algorithms, Networks and Distributed Systems, Object-Oriented Design, Web Development, Data Science, Computer Systems, Database Design, Software Engineering, Cybersecurity

Honors & Awards: Cum Laude, Dean's List, Dean's Scholarship

The University of Tokyo, Tokyo, Japan

April 2024 – August 2024

USTEP Exchange Program

RELEVANT EXPERIENCE

Sirinti

June 2025 – Current

Full Stack Software Engineer Intern

Remote

- Developed features and components that improved site usability, boosting engagement and increasing time-on-page by 20%
- Architected scalable RESTful APIs with JWT-based authentication to handle CRUD operations, enabling seamless and secure integration between PostgreSQL, Nest.js backend, and Vite/Next.js frontends

Cirrus Data Solutions

June 2023 – December 2023

Software Engineer Co-op

Remote

- Enhanced a cloud migration demo platform used by 100+ global organizations by delivering new UI features across 40+ scenarios, improving user experience and simplifying admin tasks
- Consolidated observability data from Azure Functions and AWS EC2, enabling cross-cloud visibility
- Implemented KPI and cost-tracking metrics, driving 15% cost savings on infrastructure spend

Chirp

February 2023 – May 2023

Software Developer Intern

Remote

- Launched a responsive B2B/B2C website that supported the Wharton VIP startup's early-stage growth and visibility
- Partnered with UI/UX designer to translate Figma mocks to code, preserving accessibility and design intent

Northeastern Electric Racing

September 2022 – May 2023

Software Team Member

Boston, MA

- Developed new features and resolved user feedback for a project management platform serving 250+ active members, enhancing usability and engagement
- Resolved bugs and conducted unit testing in React/Express/Prisma stack, ensuring production stability

PROJECTS

Animal Farm | Unity, C#, Firebase

Current

- Collaborating with 5+ international peers to develop a mobile productivity app designed to boost focus retention through gamification mechanics
- Integrated and designed Firebase authentication and database, enabling secure multi-user logins and synchronized progress tracking across devices

Menu Passport | Python, GCP, LangChain

October 2025

- Engineered an agentic AI system orchestrating 10 specialized tools to extract foreign menu items with OCR and enrich with translations, currency conversion, and dish imagery
- Optimized system performance through intelligent caching and context engineering, reducing token usage by 60%

Kanbas | TypeScript, React, JavaScript, Node.js, MongoDB

December 2024

- Built a full-stack LMS replica supporting courses, quizzes, and assignments with secure role-based permissions, validated with 50+ simulated users
- Designed schema and APIs to scale to 100s of users, simulating real-world load

NomNomNow | Python, Docker, SQL, ngrok

December 2022

- Partnered with 2 peers to prototype a restaurant delivery service, producing relational and ER diagrams, and designing 13 SQL tables with 390+ mock entries for testing
- Built and connected application screens in Appsmith to a Flask/SQL backend, delivering a fully functional demo for order placement and delivery tracking

SKILLS

Programming Languages: Python, Java, TypeScript, JavaScript, C, C#, SQL, NoSQL, Tailwind, HTML, CSS, PHP, Shell

Frameworks & Libraries: React, Node.js, Flask, FastAPI, LangChain, Next.js, Nest.js, REST, Express, Prisma, Redux

Databases: MySQL, PostgreSQL, MongoDB, Firebase

Tools & Platforms: Git, GCP, Docker, Jenkins, VS Code, IntelliJ IDEA, DataGrip, Figma, VMware, Ngrok, Gradle

Spoken Languages: English & Japanese (Bilingual), Mandarin (Intermediate)
